

# ABOVE GROUND POOLS

## Installation Details

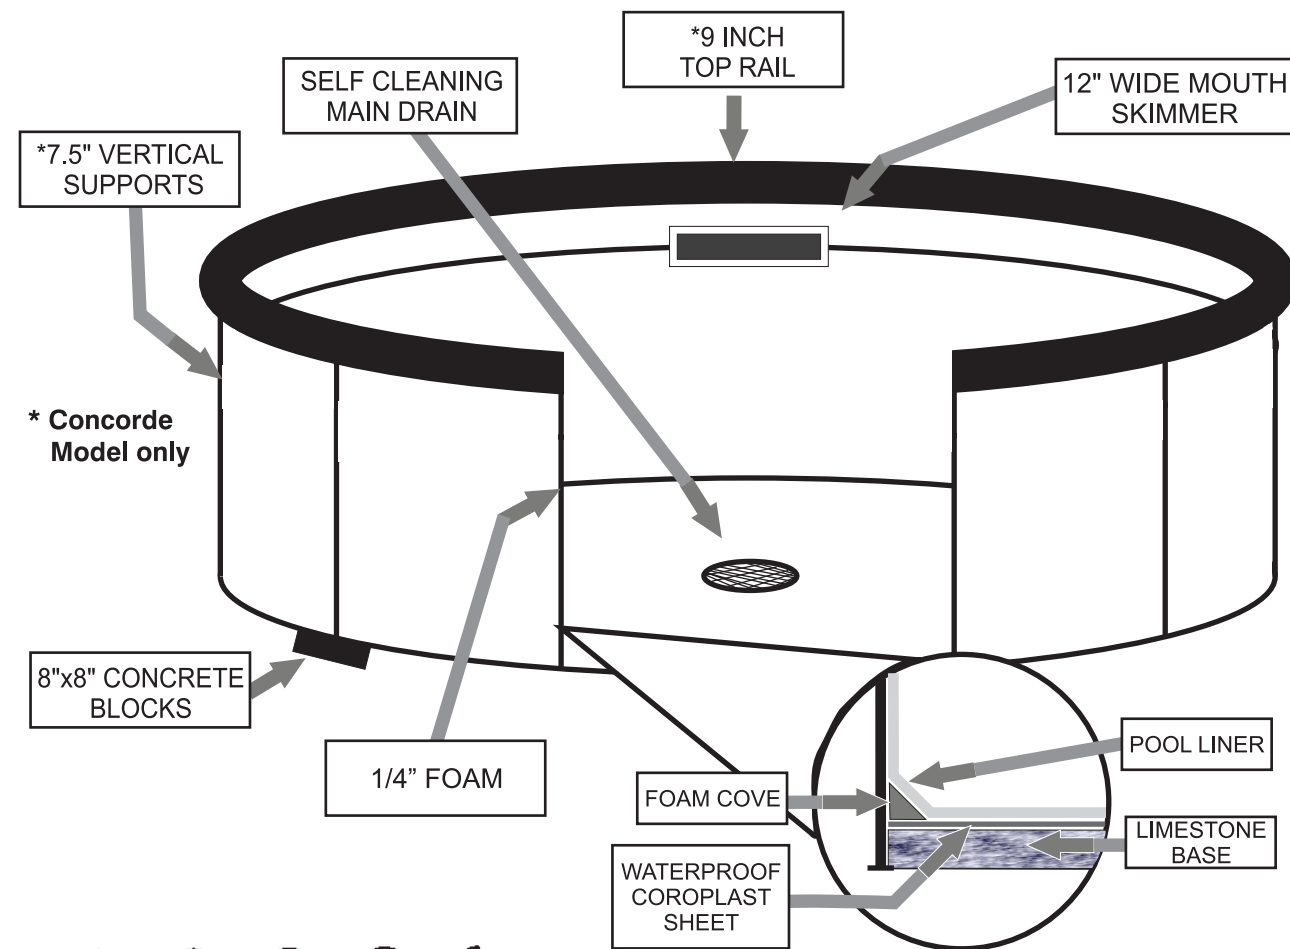

**WALLS:** 1/4" Foam, adds comfort and insulation

**CORNERS:** Foam cove in bottom corners.

**BOTTOM:** Waterproof "Coroplast" sheet under liner to ensure a smooth bottom & to prevent liner issues.

**DRAIN:** Standard self cleaning main drain for easy maintenance, maximum filtration and drainage in fall.

**BASE:** Limestone Screenings - provides a subfloor similar to concrete, eliminates foot impressions and compacts better than sand. Providing years of satisfaction and worry free enjoyment.

*A Name You Can Count On!*

Established in 1975 by Brian Healey, Water World Home & Leisure Centre is a family owned and operated business. In 1984 David Healey joined the pool construction crew, followed by Darryl Healey in 1986. They both share the position of Foreman on inground pool installation. Cheryl Healey took over the position of General Manager in 2002. Water World Pools has grown steadily to become an area leader in the pool market, now installing well over 100 pools each year. From above ground to inground, vinyl to concrete, Water World is truly Peterborough's Full Line Dealer.

Over the years Water World has constantly changed in step with new advances in the pool industry. As new methods and materials have come available. Water World has utilized them to their fullest, at the same time being careful to change existing methods and materials only when the changes improved the end product.

The real foundation of a Water World pool is quality. They understand that your pool should provide you with a lifetime of worry free enjoyment, so they build every one to last. You can be assured that Aqua Pro 2000 line is built with a high quality standards, of workmanship and materials.

Water World feels that your new pool should be worry free right from the beginning. That is why they are fully covered by Contractors Liability insurance up to \$2,000,000 to ensure that you, the customer are protected from any possible liability or negligence on their part. As well they are members of the Better Business Bureau, the Chamber of Commerce and are covered under the Workplace Safety & Insurance Board.

Water World uses minimal subcontractors. They supply all necessary labour and material to ensure that total control over every aspect of your pool installation is possible, in order to meet their exacting high standards.

Remember, service from Water World goes far beyond your initial installation. They will supply expert advice on the use and care of your pool, and you can always count on them to carry a complete line of chemicals and accessories to make your pool ownership experience a pleasure, now and in the future.

QUALITY CONSTRUCTION - SOUND ENGINEERING

**Aqua Pro, by Water World, sets the pace in swimming pool design and technology.** For many, many years, we have set the standard that other companies must try to measure up to.

**Conditions in Canada are like no where else.** Climate, terrain, soil and geography in Canada are unique in the world and these unique conditions have provided us with many engineering challenges over the years.

**Aqua Pro met these new design challenges head on. Since the early sixties Aqua Pro acquired the experience which could only have come from installing many thousands of pools.** Aqua Pro pioneered monolithic grout bottoms, frost resistant aluminum coping systems with replaceable coverings, non corrosive super structures and still we are constantly refining and improving our product.

**Since 1965, Aqua Pro's innovative designs have provided a wider variety of pools, in a broader range of shapes and prices.**

Aqua Pro pools have been chosen for high temperature sites near the Equator as well as areas where harsh winter freeze ups would devastate a pool of lesser quality.

**Being a pioneer in the pool industry means setting the standard where none existed.**

An exclusive engineering report, prepared by an independent consulting engineering firm is your further assurance that every pool they manufacture will provide you with years of trouble free enjoyment.
